

Aircare Omniscient

Uplifting The Environment

AHS Omniscient takes aircare into the modern business world by not only enhancing the working environment for both staff and visitors, but also uplifting both mind and spirit too.

Providing up to 500 cubic metres of fragranced air, whilst being unobtrusive to the user and the environment, makes Omniscient a great delivery system for large interior spaces.

How does it work?

Biodegradable ceramic refills are impregnated with designer oils, from classical to oriental, aromatherapy to seasonal, giving all areas that bespoke touch changeable at regular service intervals. The ceramic cartridge is gently heated within the unit, and the fragrance is then dispersed by the internal fan system, instantly uplifting the air.

For use in:

Reception, care home, gym, veterinary clinic, chapel of rest, waiting area, hotel, classroom, airport, boardroom, station

Benefits

- Silent delivery system for large interior areas up to 500m³
- Constant performance for poor ventilated, odour problem areas
- Eco Friendly, No CFC's, 100% Biodegradable refills
- Choice of fragrances for style and impact options
- Fully serviced for you, nothing for your staff to do

Product Specification:

Operation: Mains operated

Dimensions:

265mm(h) x 147mm(w) x 120mm(d)

Voltage: 220vac-240vac Power rating: 70w

Class: Class 1 / 0.3A / IP 23 / 50-60 Hz

Sustainability

Eco Friendly, No CFC's, 100% Biodegradable refills

Aircare Prozone

A Breath Of Fresh Air

There are some places where up until now, it seemed we had little choice but to put up with unpleasant organic odours and airborne micro-organisms.

AHS Prozone offers a 'natural solution' to this problem by eliminating bad smells and destroying up to 99.5% of harmful airborne viruses and bacteria. This process greatly reduces cross infection in the work place for a safe environment.

How does it work?

Ozone or 'Activated oxygen' is produced in nature by lightening. After a thunderstorm we often experience this by the greater freshness of the air. AHS Prozone mimics this process by bringing the air we breathe into contact with a high energy electrical discharge, putting a small trace of activated oxygen into the environment to reproduce this natural freshness.

For use in:

Nursing home, toilet, locker room, waiting room, reception, medical centre, conference facility, sluice room, garbage room, hotel, smoking area.

Dimensions: 210mm x 135mm x 85mm

Adjustable to match room size up to 150m²

EU LVD - Directive 2006/95/EC. EU

EMC - Directive 2004/108/EC, EN 55014-2:1997

50/60 Hz / Fuse rating 5A / 12 Watts / Voltage:85V-264V

Benefits

- Safe, continuous method, working throughout the day
- Destroys up to 99.5% of micro-organisms reducing cross-infection
- Purified air reaches all inaccessible areas for complete freshness
- Environmentally Friendly, no chemical residue
- Tackles the root cause of the bad odour
- Tailored settings for all locations
