

Hand Drying

Twin Jet Technology

Pressurised air travelling at **95 miles per second** strips moisture from the hands leaving them dry in just 10 seconds.

No more wasting time!
JetAir dries hands in just **10 seconds**

UV Sterilisation kills **99.9%** germs upon use for instant infection control

Dry Zone LED feature provides a visible indication of the drying zone, ensuring the user's hands are always in the warm air stream

Drainage Tray with level indicator removes slip hazards by collecting any waste water

Hepa Filter System removes **99.97%** of bacteria from the air stream, making this one of the most hygienic hand dryers

Antimicrobial easy to clean **Silver** or **White** coating

Reducing energy bills and carbon emissions for a positive impact on your business.

Technical:
IPx4 Rated
Net Weight 11kg
Sound Level 76db
Air Velocity 95 m/s
Supply Voltage 100-130 volts 50/60Hz
300mm x 685mm x 220mm (H x W x D)

Energy cost comparison on 200 hand dries	200 dries	300 working days pa
Jet Air (2.050kW high setting with element)	£0.1024	£30.72
Jet Air (1.65kW low setting with element)	£0.1153	£34.60
Conventional Dryer (2.4kW)	£0.354	£106.20
Paper (4000 @ £18, average of 2 towels)	£1.80	£540

(Based on energy charge at £.09 per kw/hour)
