

Aircare Eco 'V' Air

Considering your global footprint

Eco 'V' Air provides an uplifting impression for today's busy working environment, whilst considering your global footprint.

Companies of today are looking at ways to reduce their environmental impact in order to improve sustainability targets. Eco 'V' Air provides the answer.

This innovative and continuous system creates an environment that is permanently fresh all day, every day by dispersing uplifting fragrance through air movement.

Recyclable plastic refills

Benefits

- Capillary action fragranced oil – constant results
- Silent air movement – non obtrusive with complete coverage
- No butanes or gases – environmentally friendly
- Fragrance rotation – for maximum impact
- Recyclable plastic refills – reducing global footprint
- Fully serviced for you – nothing for your staff to do
- Fan assisted option – for limited air flow areas

Sustainability – Used refills are 100% recyclable into plastic waste. Non-aerosol system providing no butanes or gases
